- Home
- Email the results

Users can send the results of their selection to themselves or someone else. They need to enter an email address. An error message is displayed if they select 'Send Email' without entering an email address first or if they enter an invalid email address.

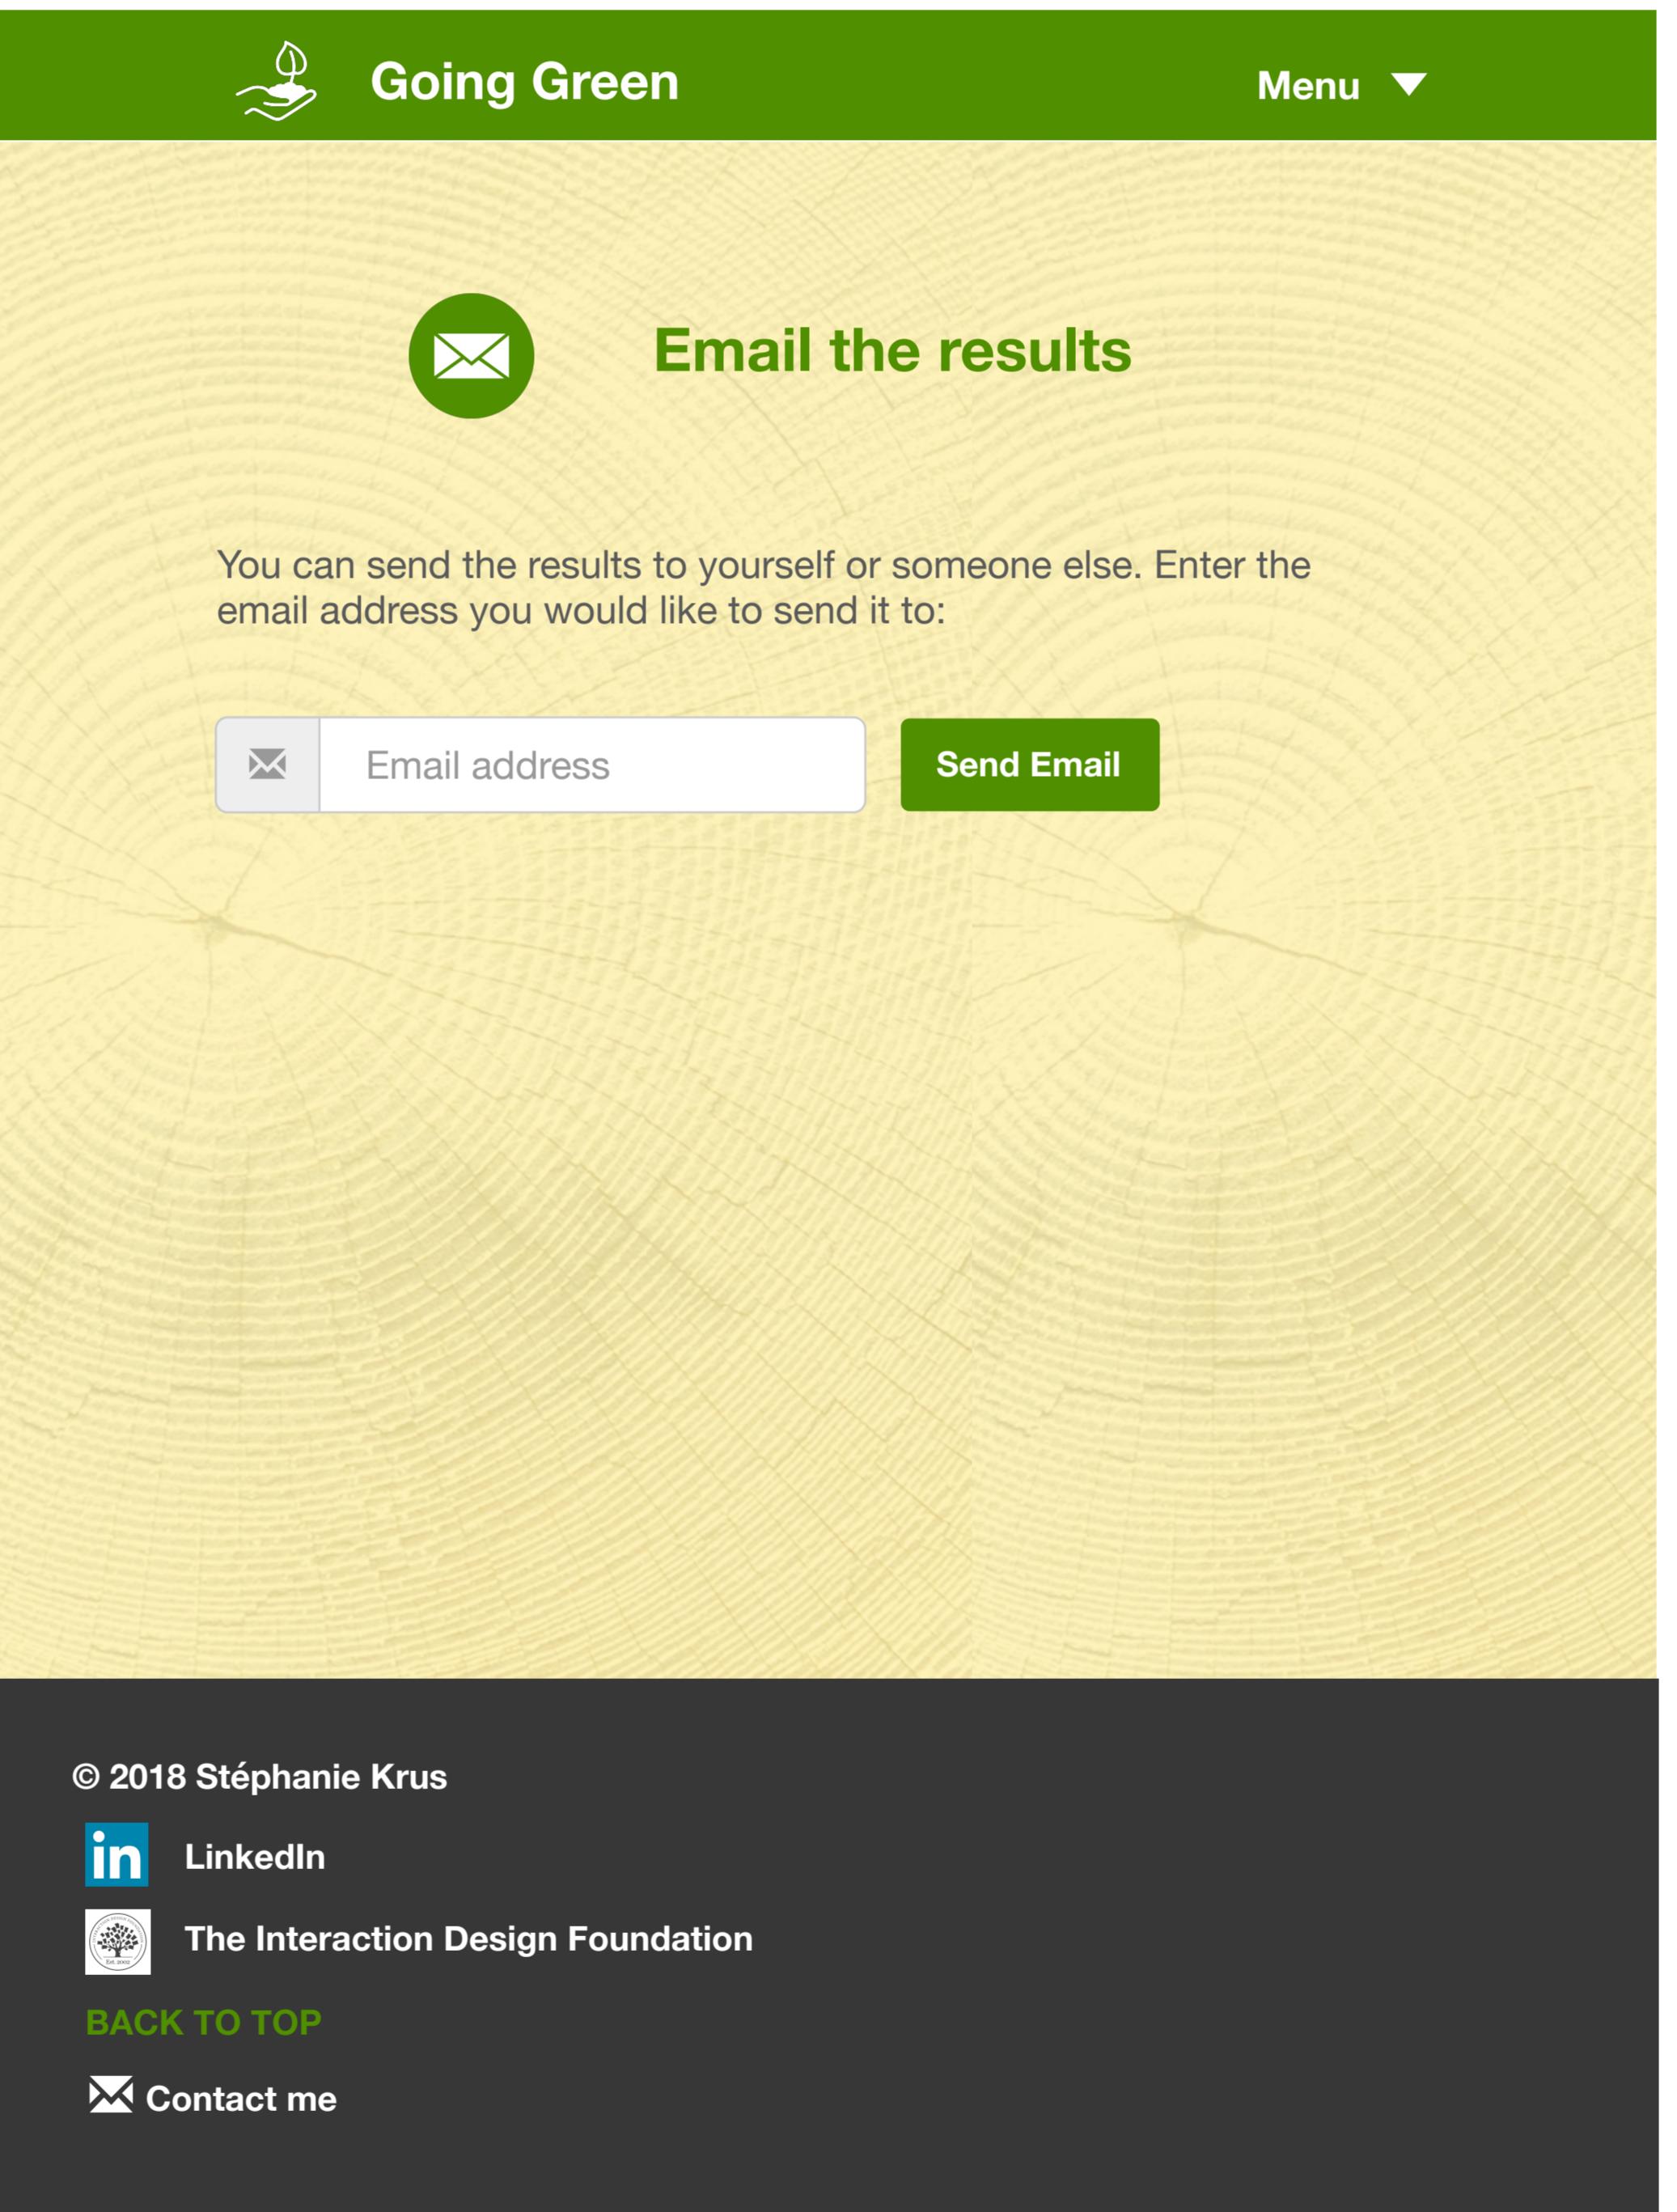

Sending the email itself is dealt with their email provider. The subject and body of the email should be in the language selected, and the body is a summary of the results depends on the number of chickens selected, people, location and crops selection.

This section could probably be improved by allowing to share the results with more options (email, text message, messenger and other social media). This could lead to replacing this section by a sharing option somewhere on screen. (more work to be done and usability testing to do)

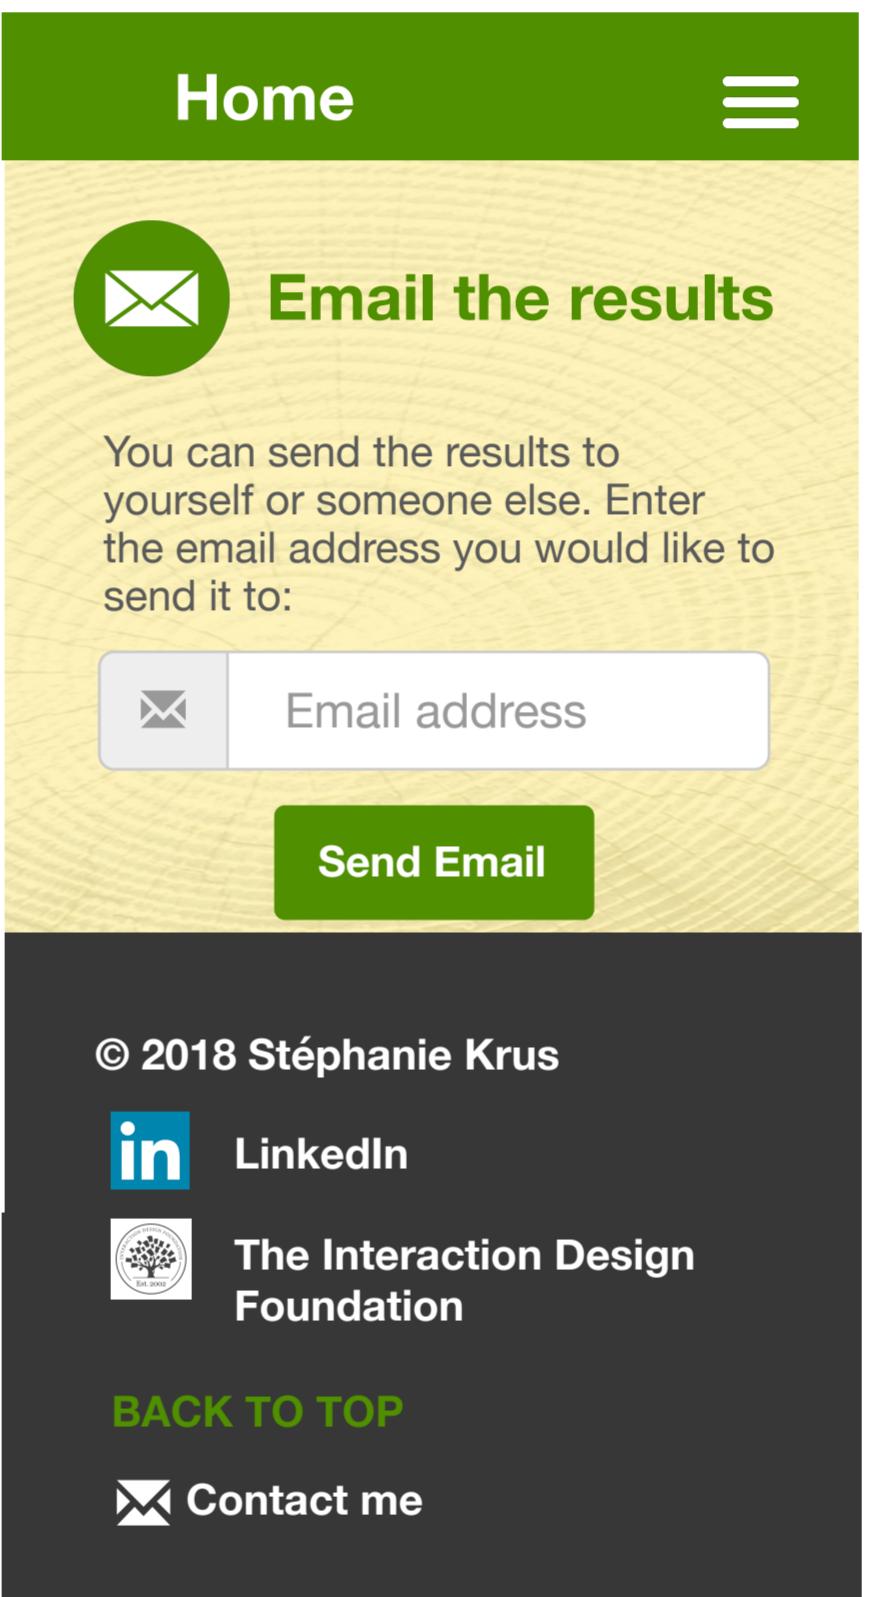

#### Email the results on various devices:

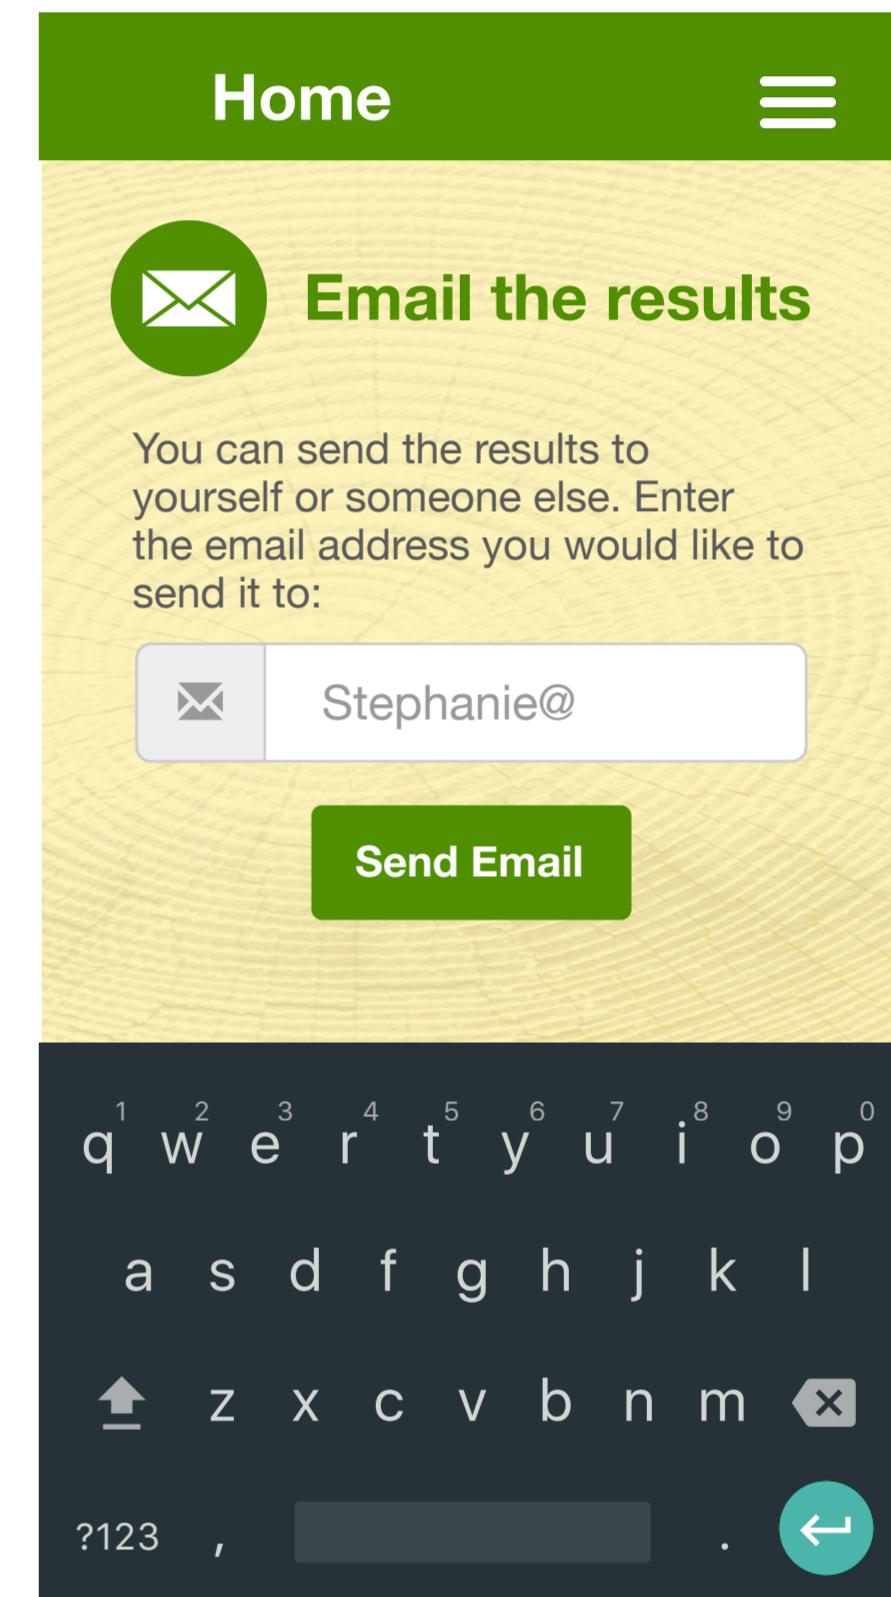

The screenshot shows the desktop version of the website. At the top, there's a navigation bar with links for Home, About, Design, Settings, and a French flag icon. Below the navigation is a main content area with several cards: 'Raising chickens', 'Solar panels', 'Saving water', 'Grow your own', and 'Email the results'. The 'Email the results' card contains a form with an 'Email address' input field and a 'Send Email' button. At the bottom of the page, there's a footer with copyright information for 2018 Stéphanie Krus, links to LinkedIn and The Interaction Design Foundation, and a 'Contact me' button.

The screenshot shows a mobile device displaying the 'Email the results' section. It features a large green header with the 'Going Green' logo and a 'Menu ▾' button. Below the header is a form with an 'Email address' input field and a 'Send Email' button. The background has a wood-grain texture. At the bottom, there's a footer with copyright information for 2018 Stéphanie Krus, links to LinkedIn and The Interaction Design Foundation, and a 'Contact me' button.

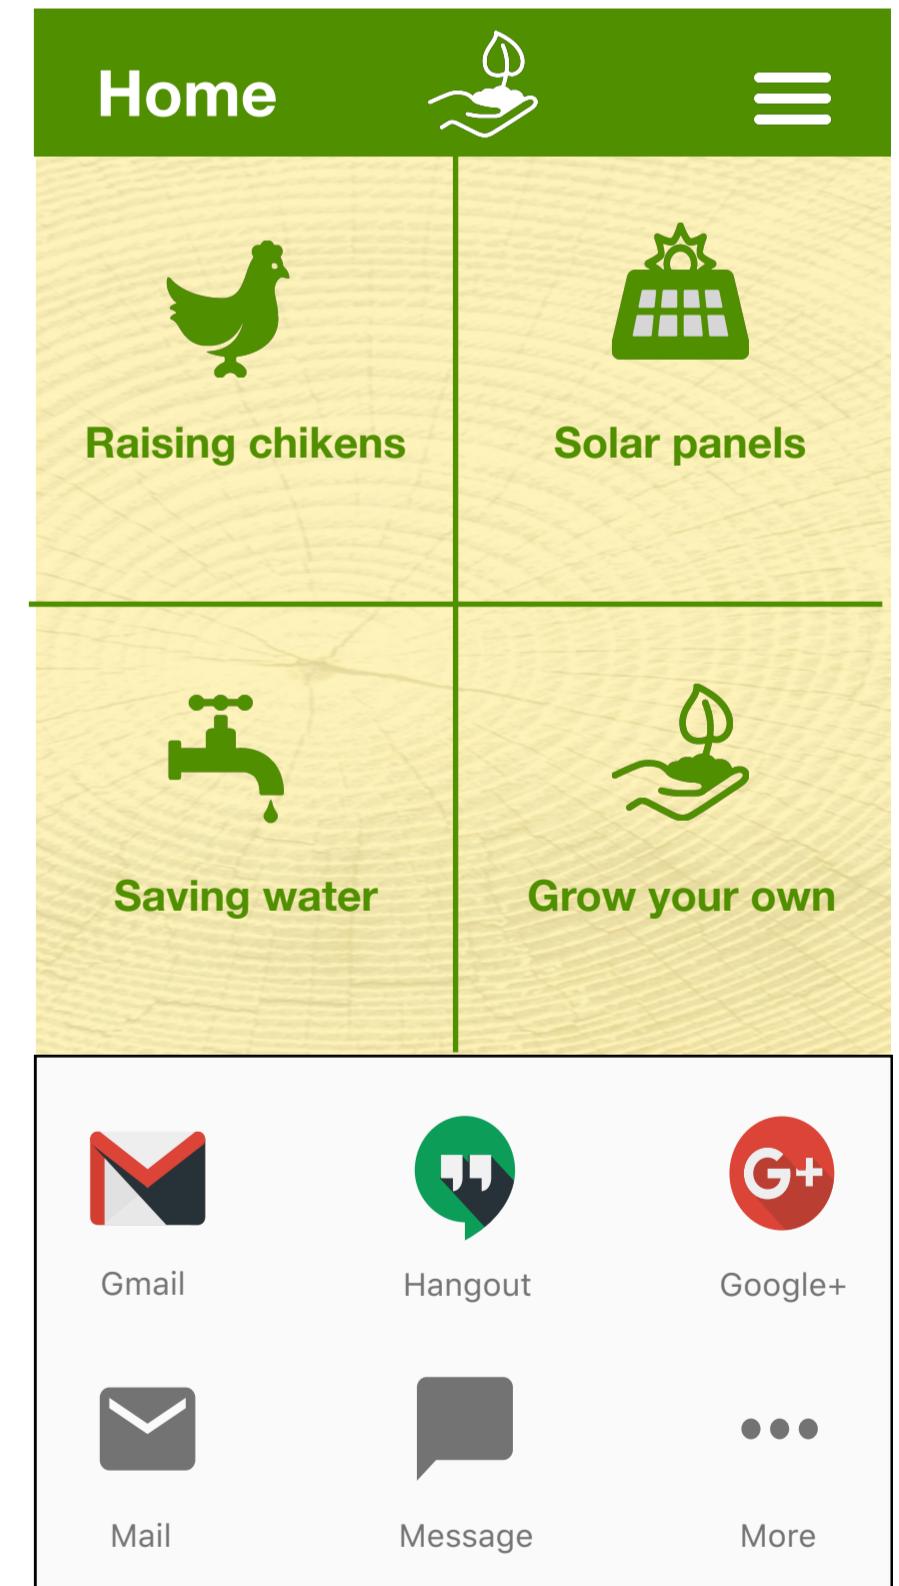

A smaller screenshot of the mobile 'Email the results' section, showing the same layout as the previous one but in a compact view.

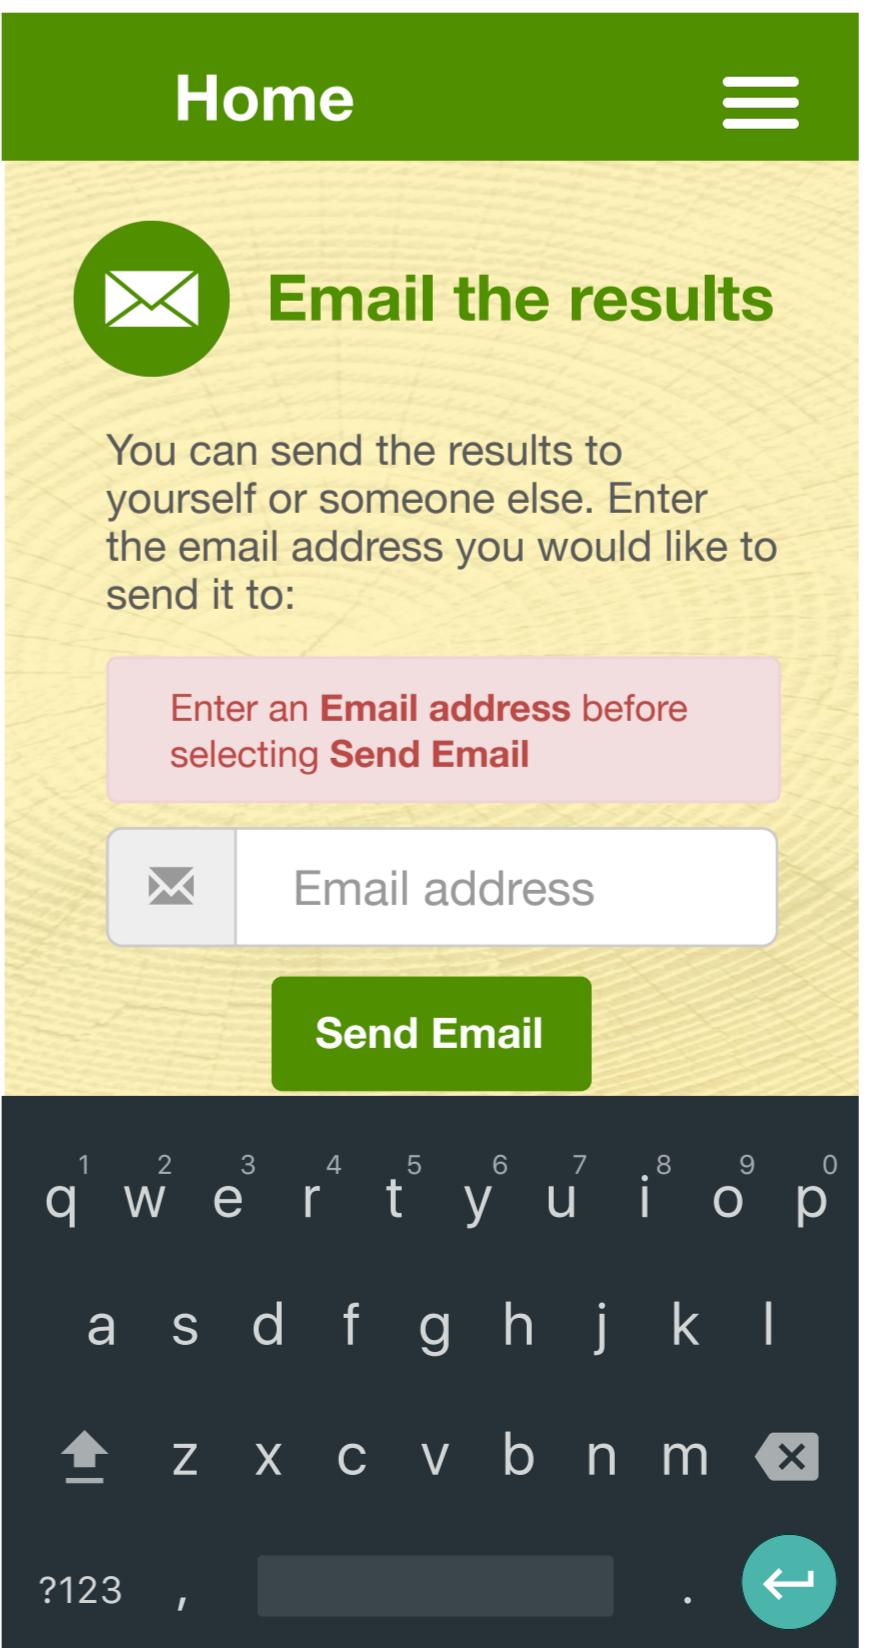

A second smaller screenshot of the mobile 'Email the results' section, showing the same layout as the previous ones.

#### Alternative design using sharing instead of just emailing:

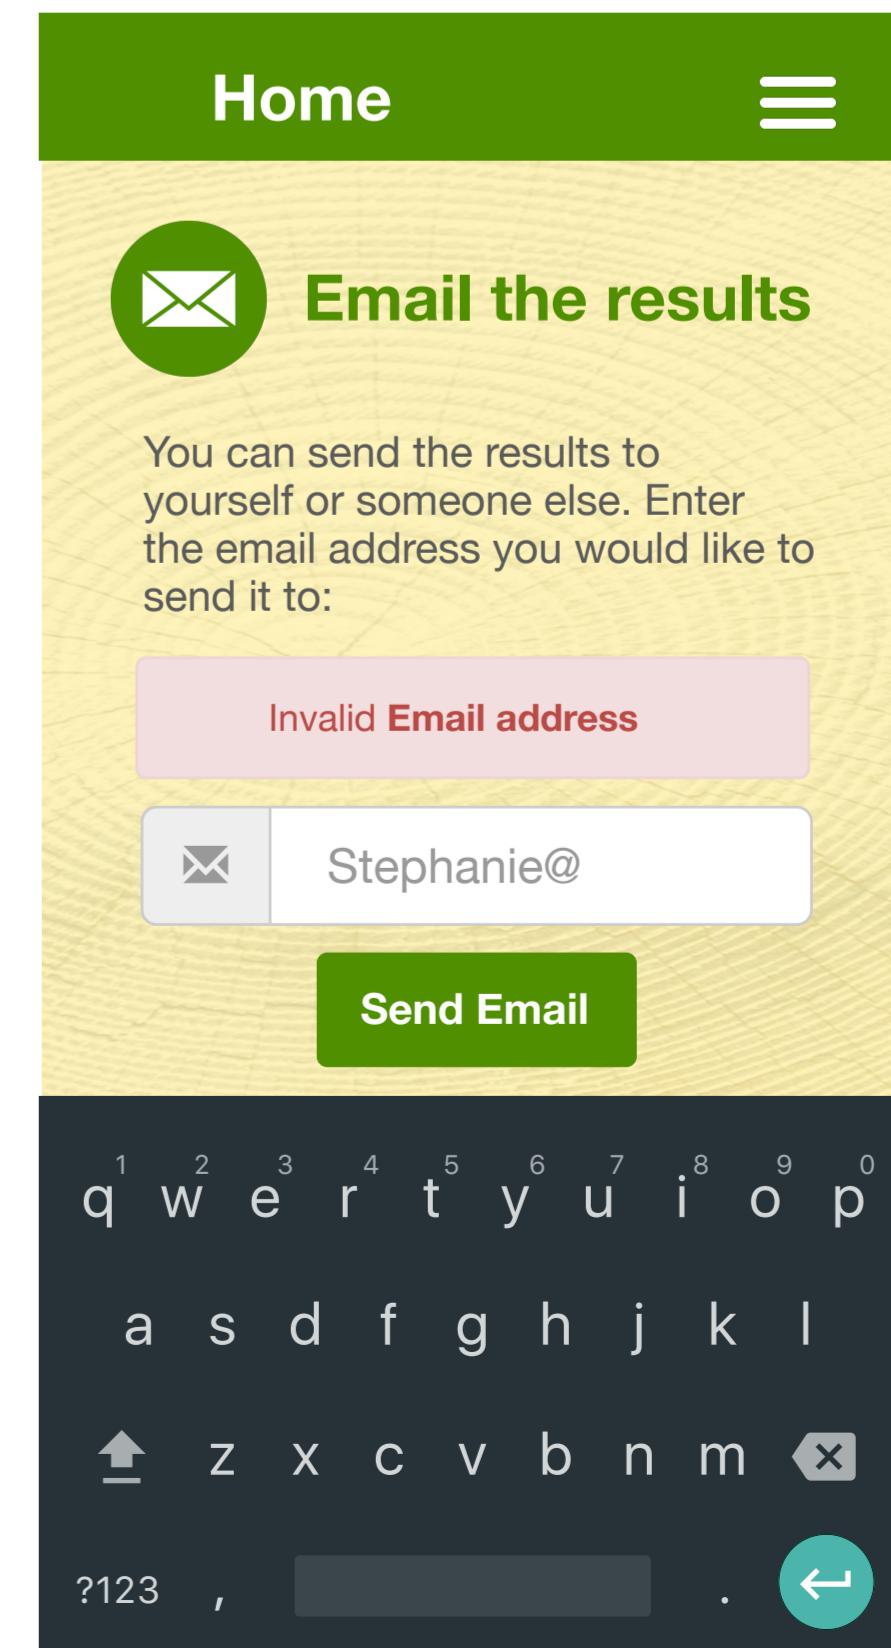

This screenshot shows an alternative mobile design for the 'Email the results' section. It features a grid layout with four items: 'Raising chickens', 'Solar panels', 'Saving water', and 'Grow your own'. To the right of these items are icons for 'Gmail', 'Hangout', 'Google+', 'Mail', 'Message', and 'More'. The overall design is cleaner and more modern than the original.

#### Error messages if no input, or invalid input:

The screenshot shows a mobile device displaying the 'Email the results' section. A red error message box at the top says 'Enter an Email address before selecting Send Email'. Below it is an 'Email address' input field and a 'Send Email' button. The background has a wood-grain texture. At the bottom, there's a footer with copyright information for 2018 Stéphanie Krus, links to LinkedIn and The Interaction Design Foundation, and a 'Contact me' button.

The screenshot shows a mobile device displaying the 'Email the results' section. A red error message box at the top says 'Invalid Email address'. Below it is an 'Email address' input field containing the text 'Stephanie@' and a 'Send Email' button. The background has a wood-grain texture. At the bottom, there's a footer with copyright information for 2018 Stéphanie Krus, links to LinkedIn and The Interaction Design Foundation, and a 'Contact me' button.
